Policy and science leaders from outside the consortium will be invited as keynote speakers to share their views of EFFORT results as well as their own thoughts and findings.

Major topics will be covered such as:

- The optimal use of antimicrobials in food-producing animals,
- The use of metagenomics for AMR surveillance along the food chain,
- The exposure of humans to AMR micro-organisms through food,
- The effectiveness of AMU-interventions and their economic aspects,
- The needs for future policy changes to minimise public health risk due to AMR.
